Sacramento, CA 95814

Dear Mr. Snow,

I recently attended a public hearing in Pittsburg and was frankly disappointed in the three options presented. I urge you to ensure that CALFED create a fourth alternative based on conservation and restoration to provide ample and high-quality water for all California families, wildlife, farms and businesses. This fourth alternative would

- Restore California's fish, birds, wetlands, rivers, delta and bay.
- Restore and protect our watersheds and groundwater basins for high-quality water for people and wildlife.
- Maximize water efficiency before even considering costly new dams, reservoirs and canals.
- Ensure effective water conservation programs and economic incentives to use water more efficiently.

Please enter these comments into the formal record for your Draft Programmatic Environmental Impact Report and Statement.

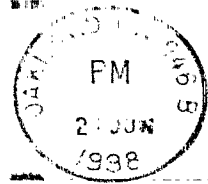

Sincerely,

Carlo F. Cattarin, CFP
Certified Financial Planner
